** Core features of web experience

Single Sign On

Recognize provides support for any SAML SSO provider, currently through Outlook, Sharepoint, mobile, and the Recognize website. The Recognize mobile apps support Microsoft and Yammer oAuth.

Auth0

User Directory Sync

Through Office 365 Azure Active Directory, Recognize can conduct a one-way sync of the following data on a nightly basis:

- Email
- First name
- Last name
- Display name
- Manager
- Avatar
- Birthday (day/month)
- Hire date (not available from Yammer)
- Job title
- Group affiliations

More information on how user sync works: <https://recognizeapp.com/resources> or support@recognizeapp.com

Connecting it All Together
